E. **Mirror** lighting

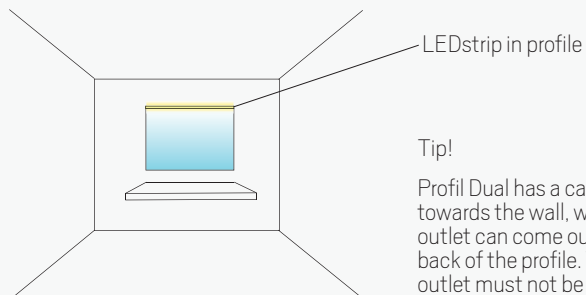

Assembly sketches

E. Mirror lighting

Different ways of lighting mirrors

E1. Installation above mirror

Profile installed on wall with Cover High Opal and lighting out into the room. Profile installed using clips.

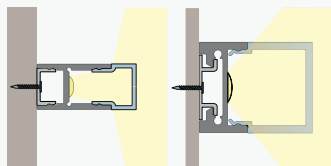

Tip!

Profil Dual has a cable duct at the back towards the wall, which means that the outlet can come out anywhere along the back of the profile. The diameter of the outlet must not be greater than the width of the profile.

Recommended profiles and covers:

Dual

Lean

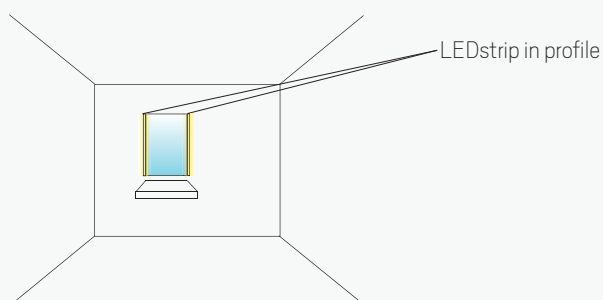

Cover High Opal

Cover High Opal

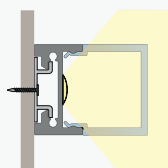

E2. Installation beside a mirror

Profile with Cover High Opal is fitted vertically on the wall, beside the mirror on each side.

Recommended profiles and covers:

Lean

Cover High Opal

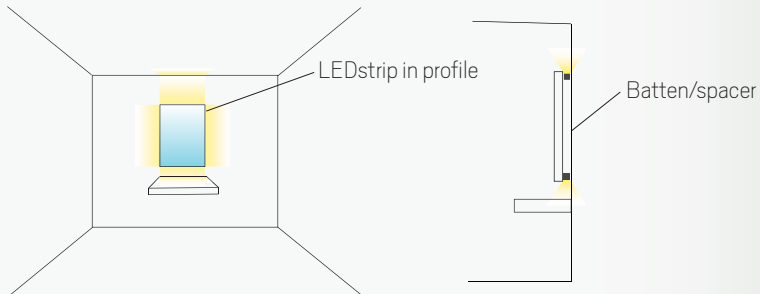

E. Mirror lighting

Different ways of lighting mirrors

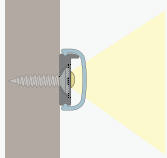

E3. Installation behind mirror

The profile is installed on battens/spacers or the mirror structure and illuminates outwards along the wall. For a round mirror, LEDstrip is installed without profile.

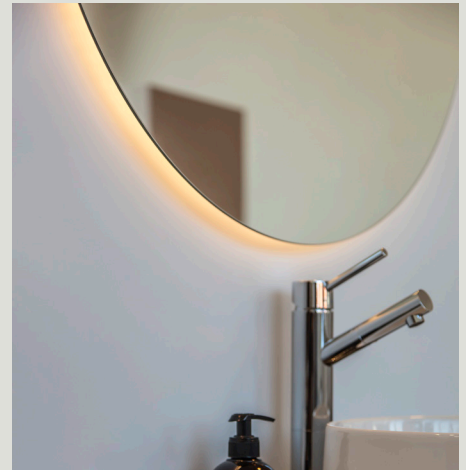

Recommended profiles and covers:

Art Slim

Cover Opal or
without

See overview table with profiles, LED strips and covers here:
