

## OPTIC TRACK XXS 1-PHASE 36° WHITE

Minimalist, dimmable tracklights with replaceable LED and driver – built for the future. Using the DIP-Switch colour temp function, colour temperature is easily adjusted with the touch of a button on the back of the luminaire (not Tune). With reflector technology, high luminous efficacy is ensured with distinct and clear light distribution – perfect as accent lighting when you want to direct the light onto what you want to highlight, but also as general lighting in both private and public environments. Low-build adapter for 1-phase track. For improved glare reduction, the Honeycomb accessory can be added to the luminaire. You can easily replace the reflector with a lens accessory to adjust the light distribution as needed. The kit contains four luminaires, two 1m 1-phase tracks, two connections, two end caps and one straight connector.
