Measurement and installation

The converter is available in IP20 and IP67. The IP20 version must be installed in an IP-rated junction box, features a replaceable fuse, and can be placed up to 15 m from the LED strip. In the kits, the IP67 version is integrated onto the connection cable, 0.5 m from the LED strip. The separate IP67 Converter accessory instead features a 2 m cable between the LED strip and converter, as well as 1 m to the mains plug.
