

CASAMBI CLOUD GATEWAY POE

Casambi Cloud Gateway acts as a bridge between the local Casambi network and the cloud – a discreet yet powerful tool for remote monitoring, troubleshooting, and system integration. It enables secure connection to the Casambi cloud, making it easy to control lighting remotely. The gateway is available in two models: one powered via standard 230 V with a transformer, and one using Power over Ethernet (PoE) – ideal for modern network installations where minimizing cabling and combining power and data in a single Ethernet cable is preferred. Both versions feature built-in protection against communication loss, buffer events locally, and automatically reconnect in case of network issues.

DESCRIPTION

GTIN:	7392971156453
Item Name:	Casambi Cloud Gateway POE
Warranty:	5 years

OPERATION AND CONNECTION

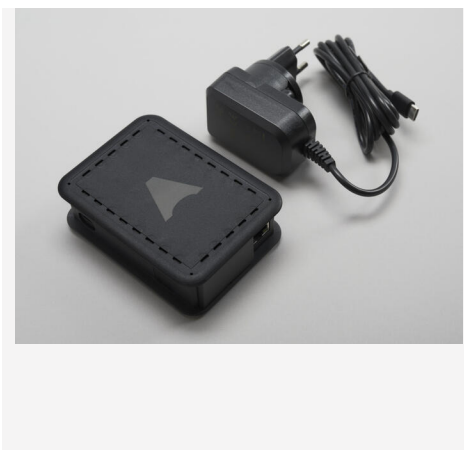

Min. Ta (°C):	0
Max. Ta (°C):	50

COLOR AND MATERIAL

Material:	Plastic
Color:	Black

MEASUREMENT AND INSTALLATION

Operating Environment:	Indoor / dry locations
IP Degree of Protection:	20
Installation:	Surface mounted
Length (mm):	101
Width (mm):	74
Height (mm):	32
Weight (kg):	0,096

(mm)
