! The test is a recommendation. The properties of the installation can affect both the dimmer and the drive's ability to be dimmed.
! The outcome of the test is according to Hide-a-Lite's own opinion and does not have to agree with installers or sut users.

! Selected dimmers are a few examples of what the market has to offer. Always follow the dimmer manufacturer's recommendations with any loads and settings for the best effect. The result is an outcome of our tests and may vary depending on the installation.
